

SSL ENCRYPTION & SECURITY

Operator: Linaq LLC

Website: JackpotRush.io

Effective Date: September 1, 2026

Version: 1.0

At JackpotRush.io, operated by Linaq LLC, protecting the security of our Users, Accounts, transactions, and Platform is an important part of our operations.

We use reasonable administrative, technical, and organizational safeguards designed to protect information and Platform activity against unauthorized access, misuse, alteration, disclosure, loss, or destruction.

This page provides general information about security measures associated with JackpotRush.io.

1. SECURE CONNECTIONS

JackpotRush.io is designed to use secure connections when information is transmitted between a User's browser or device and our Website.

Users should access JackpotRush only through the official:

JackpotRush.io

domain.

Before entering Account, payment, identity, or other sensitive information, Users should verify that they are accessing the legitimate JackpotRush.io Website through a secure HTTPS connection.

2. SSL/TLS ENCRYPTION

JackpotRush.io uses SSL/TLS encryption designed to protect information transmitted between a User's browser and the Website.

SSL/TLS technology helps protect information while it is in transit by encrypting communications between supported devices and JackpotRush systems.

This helps reduce the risk that information transmitted through a secure connection can be intercepted or read by unauthorized parties.

SSL/TLS encryption protects information in transit and should not be interpreted as a guarantee that any online system is completely secure.

3. ACCOUNT SECURITY

JackpotRush uses security controls designed to help protect User Accounts.

Depending on the circumstances, these controls may include:

- Account authentication;
- login security;
- session management;
- access controls;
- suspicious-activity detection;
- device or network analysis;
- Account verification;
- identity verification; and
- temporary Account restrictions when potentially unauthorized activity is identified.

Users also play an important role in protecting their Accounts.

4. USER PASSWORD AND LOGIN SECURITY

Users should:

- create a strong and unique password;
- avoid using the same password on multiple websites;
- keep login credentials confidential;
- never provide passwords to another person;
- avoid saving credentials on shared or public devices;
- log out after using a shared device;
- protect devices with passwords or biometric security where available; and
- immediately report suspected unauthorized Account access.

JackpotRush Customer Support should never need a User's Account password in order to provide ordinary assistance.

5. PAYMENT SECURITY

Payment information may be processed through authorized payment-service providers.

Depending on the transaction and payment method, certain sensitive payment information may be transmitted directly to or processed by the applicable payment provider.

JackpotRush may receive information necessary to administer a transaction, such as:

- transaction identifier;
- payment status;
- amount;
- date and time;
- payment-method information;
- risk information;
- verification results; and
- related transaction records.

JackpotRush does not claim that every payment credential is stored directly by Linaq LLC.

Payment providers may maintain their own security controls and compliance obligations.

6. IDENTITY VERIFICATION SECURITY

JackpotRush may require identity or age verification to help:

- confirm Account ownership;
- establish User eligibility;
- prevent identity fraud;
- protect Prize redemptions;
- investigate suspicious activity; and
- satisfy applicable compliance requirements.

Identity verification may be performed with assistance from authorized service providers.

Users should provide verification information only through legitimate JackpotRush interfaces or authorized verification processes.

7. GEOLOCATION SECURITY

JackpotRush may use geographic-verification technology to determine whether a User is physically located in an eligible jurisdiction.

Geographic and technical signals may include:

- IP address;
- device information;
- network information;
- location signals;
- GPS-related information where applicable;
- VPN indicators;
- proxy indicators; and
- location-manipulation indicators.

Users may not attempt to circumvent geographic restrictions through VPNs, proxies, GPS spoofing, false location information, remote-access tools, or similar methods.

8. FRAUD PREVENTION

JackpotRush may use security and fraud-prevention controls designed to identify potentially unauthorized or prohibited activity.

These controls may consider information relating to:

- Account activity;
- login activity;
- devices;
- networks;
- geographic location;
- purchases;
- payment activity;
- gameplay;
- promotions;
- Gold Coins (“GC”);
- Sweepstakes Coins (“SC”);
- Redeemable Credits (“RC”);
- Prize-redemption activity; and
- other relevant security signals.

Potentially suspicious activity may be subject to additional verification or review.

9. PROTECTION OF STORED INFORMATION

JackpotRush uses reasonable safeguards designed to protect information maintained within systems under its control.

Depending on the system and information involved, safeguards may include:

- access restrictions;
- authentication controls;
- role-based or authorized access;

- secure system configurations;
- logging;
- security review;
- data-protection measures; and
- procedures for responding to security concerns.

Access to sensitive information should be limited to persons or service providers with an appropriate business, operational, security, compliance, or legal need.

10. THIRD-PARTY SECURITY

JackpotRush may rely on authorized third parties to provide services relating to:

- payment processing;
- identity verification;
- geographic verification;
- hosting or infrastructure;
- security;
- fraud prevention;
- communications;
- analytics; and
- other Platform functions.

Third-party providers may maintain their own systems, security controls, and security responsibilities.

JackpotRush seeks to use providers appropriate for the functions they perform, but no third-party system can be guaranteed to be completely secure.

11. SECURITY MONITORING

JackpotRush may use automated and manual measures designed to identify security events or suspicious activity.

Depending on the circumstances, JackpotRush may:

- request additional verification;
- require a password or credential reset;
- restrict a transaction;
- restrict certain Account functions;
- review Account activity;
- investigate suspected unauthorized activity; or
- temporarily restrict an Account while a security issue is reviewed.

Security restrictions may remain in effect for a reasonable period necessary to investigate and address the identified concern.

12. PHISHING AND FRAUDULENT WEBSITES

Users should be alert to phishing attempts and websites that impersonate JackpotRush.

Users should:

- verify that they are accessing JackpotRush.io;
- avoid clicking suspicious links;
- avoid providing credentials through unsolicited messages;
- never send passwords by email or text;
- verify unexpected payment or verification requests; and
- report suspicious communications claiming to represent JackpotRush.

JackpotRush is not responsible for independent fraudulent websites operated by unauthorized third parties, but Users are encouraged to report suspected impersonation.

13. KEEPING YOUR DEVICE SECURE

Users should maintain reasonable security on devices used to access JackpotRush.

Recommended practices include:

- installing operating-system security updates;
- keeping browsers current;
- using reputable device-security protections;
- securing devices with passwords or biometric authentication;
- avoiding untrusted public devices;
- avoiding suspicious downloads;
- securing email Accounts connected to JackpotRush; and
- monitoring devices for unauthorized access.

A compromised device or email Account may increase the risk of unauthorized JackpotRush Account access.

14. REPORTING UNAUTHORIZED ACCOUNT ACTIVITY

Users who believe their Account has been accessed without authorization should contact JackpotRush as soon as reasonably possible.

Contact:

support@jackpotrush.io

Users should provide sufficient information to identify the Account and describe the suspected activity.

JackpotRush may temporarily restrict the Account while investigating.

Users may be asked to:

- verify identity;
 - reset credentials;
 - identify unauthorized transactions;
 - confirm recent Account activity; or
 - provide other information reasonably necessary to investigate.
-

15. REPORTING SECURITY CONCERNS

If a User discovers a potential security issue involving JackpotRush.io, the User should report it to:

support@jackpotrush.io

The report should include enough information for JackpotRush to understand and investigate the concern.

Users should not exploit a suspected vulnerability, access information belonging to another User, interfere with Platform operation, or publicly disclose sensitive information in a manner that could create additional security risk.

16. SHARED RESPONSIBILITY

Platform security is a shared responsibility.

JackpotRush is responsible for maintaining reasonable safeguards for systems and information under its control.

Users are responsible for taking reasonable steps to protect:

- passwords;
- email Accounts;
- devices;
- payment methods;
- authentication information; and
- other credentials under their control.

Users should promptly notify JackpotRush if they suspect their Account has been compromised.

17. NO SYSTEM IS COMPLETELY SECURE

No Internet-based service, electronic transmission, storage system, payment system, or security technology can guarantee absolute security.

Although JackpotRush uses safeguards designed to reduce security risks, we cannot guarantee that unauthorized access, cyberattacks, technical failures, or other security incidents will never occur.

Nothing on this page should be interpreted as a guarantee of absolute security.

18. SECURITY UPDATES

JackpotRush may update its security practices as:

- technology evolves;
- Platform functionality changes;
- security threats develop;
- service providers change;
- compliance requirements change; or
- additional safeguards become appropriate.

This SSL Encryption & Security page may be updated to reflect material changes in our public-facing security practices.
